WEB DEVELOPER | FULL STACK EDUCATION

Looking to make an impact developing ideas on apps and websites on a smart motivated team. Ideal environment would provide opportunities for growth, support achievement, developing new skills, collaboration and hard work.

*3+ years experience developing and managing multiple HTML and CSS Front-End websites.

*Earned Full Stack Ruby on Rails, Mongodb, Angular, Node, Express and Front-End HTML/CSS certificates.

*Developed tool for less technical staff to resolve most support issues at AT&T that still saves $ today.

*Social media wizard and early adopter of cross platform promotion and growth hacker marketing.

Open source code contributions, projects and snippets.

PROFESSIONAL EXPERIENCE

Full Stack Developer - Contractor
University of San Francisco 2016 - Present
Designing and developing a front-end dashboard with the Tableau API linked to Postgres DB on Tableau Server. JavaScript | HTML5 | CSS | jQuery | Bootstrap | Tableau Server | Tableau API

Instructor Volunteer
Mission Bit | San Francisco 2015 - 2016
Kids After School Coding Program providing project advice and teaching kids to code.

Independent Contractor
Getaround, Fitbit, Sol Republic, and Zynga | San Francisco 2012 - 2015
These roles were not primarily technical but did rely on a number of multi-disciplinary skills. Each opportunity exposed me to an app or start-up idea that inspired me on some level. This exposure re-sparked interest in web development and led to the decision to level up my coding skills.

Event Operations, Front-End Developer, Social Media Manager
ReadySetRock! | San Francisco 2006 - 2012
A typical day was never typical, and one day never looked like the next. Out of necessity grew websites, blogs, and social media skills. Designed and managed entertainment website. Developed social media growth hacking marketing campaigns linking multiple platforms (websites, WordPress, Twitter, Facebook, Instagram, Google) to promote artists and events.

Operations Manager, Project Manager, Support Engineer I & II
AT&T Internet Services | San Francisco 2000 - 2006
As a function of the role, created and managed internal and external static HTML websites. Created tools to clear a backlog of 35,000 customer care emails. Developed and delivered technical training program to AT&T outsource centers. Award winning Tier 2 technical network support engineer, earning customer high praise and 2 AT&T customer service awards.
